The Patriotic Fund

Last year's contributions to the Canadian Patriotic Fund are now about exhausted. A year ago it was thought, that about 1,000 soldiers' families in Alberta would receive aid from the Fund; at the present time over 3,000 Alberta families are being cared for.

Increased need requires a new appeal for funds. Canadians did their duty last year. They will do it this year. If you cannot go to the front, you can help to support the families of those who have gone. \$1,000,000 will be distributed to families in the Province of Alberta. If the people of Alberta contribute one half of the amount required in this Province, the balance will be made up in parts of Canada where fewer families require aid and where the rate of enlistment is not so high as here.

Alberta stands first in the Provincial rate of enlistment in Canada. The fund is a national one as much as the army; just as a man when he enlists becomes a member of the Army at large, so a contribution to the Patriotic Fund becomes part of the national fund. The needs of the localities are met by the Canadian Patriotic Fund, regardless of contributions from districts. The committee does not sit in

judgment on any man who does not wear the khaki. Those who stay at home, however, are asked to contribute as much as possible, so that the soldiers' wives and children may be properly maintained while the breadwinners are fighting for the defence of the Empire and of our homes.

At this crisis, every loyal British subject is willing to do his share.

Sometimes we hear the assertion that the Government of Canada should do the work now being carried on by the Canadian Patriotic Fund. Usually, those who advance this idea are not able to suggest how this might be done, nor do they appear to have foreseen the results. The Canadian government cannot discriminate between families. The Separation Allowance is given without any favor, alike to the wife of a millionaire and to that of the poor man—the same sum to each. The wife in the former case has no claim because of need while in the latter case the separation allowance is not sufficient to support the family, even on the most economical scale. Hence, the Patriotic Fund, acting with discrimination, considering the special circumstances of each case, brings up each family's income to a reasonable level of subsistence, thus building on

the foundation which the Government has laid.

If the government supported all the soldiers' families, the majority of Canadian stay-at-homes would be deprived of the privilege of taking any part in the war.

Loyal talk will not beat Germany. Men and money will. You surely cannot cheer for the boys when they come home unless you fight or pay.

The account and books of every Branch are audited by the auditor-general of Canada.

TRIUMPH FOR BOTHA IN SOUTH AFRICA

London, Oct. 22.—"Altogether the results of the South African elections," says the Capetown correspondent of the Times, "while they undoubtedly show the existence of strong reactionary forces, constitute a great triumph for Premier Botha, General Smuts and Sir Thomas Smartt, in vanquishing the supporters of political revolution and securing South African co-operation for the empire."

"The main features of the election," the correspondent says, "may be placed as follows:

"1.—The complete collapse of the labor party in the great urban constituencies. They obtained only four seats in the whole union. Frederick B. Cresswell, a prominent labor leader, was defeated; also Leader An-drews of the Extreme section. Both defeats are signal evidence that South Africans place the

empire's war before class war.

"2.—Unionist success on the Rand and in the Cape peninsula. They are pretty sure of thirty-nine seats in the new house.

"3.—Free State is solidly Nationalist.

"4.—The net result is that the imperial position is safe. Premier Botha will have a substantial majority over the Nationalist-Labor combine, though not an absolute majority.

"5.—Three of the ten ministers have been defeated. General N. J. De Witt, minister of justice, and Theron, minister of lands, lost in Free State; and Burton, minister of railways and harbors, in Cape Colony. The list is indicative of the extent of the Nationalist re-action.

"Notable victories have been scored by Premier Botha, General Smuts and Merriman, by large majorities, and in what were considered critical constituencies.

"Freemantle's defeat at Uitenhage in a record poll, with a majority of 600, is very remarkable, as the unsuccessful candidate was an aspirant to the leadership of the Cape Nationalists and was especially responsible for the bitterness of the campaign."

STORY OF EXECUTION AROUSES WAVE OF INDIGNATION

London, Oct. 22.—The story of the execution of Edith Cavell, as told in the correspondence sent by the American minister at Brussels to the American ambassador at London, and printed in full in all the British morning papers, it is predicted, will send a wave of indignation throughout the country.

In Trafalgar Square yesterday all heads were bared to the memory of Miss Cavell. One speaker holding a wreath in his hand, to be placed on the plinth of the Nelson column to her memory, exclaimed:

"Who will avenge the murder of the splendid Englishwoman?"

In response to this appeal many new recruits came forward. The London papers, in their editorials, while paying tribute to the fine efforts of the American diplomatic representatives in her behalf, characterized her execution as "the most damnable crime of the war."

The Daily Graphic says: "The documents issued are a record of such foul and damnable infamy as all Germany's bloody crimes in this war cannot equal; for this was cold, calculated and deliberate murder. Heaven itself, nor all the mercy of all the angels, could find a mediatory explanation."

SARCEE CAMP BREAKS UP ABOUT THE FIRST WEEK IN NOVEMBER

It will be well into November before the Sarcee camp breaks up, and the force splits up between the exhibition buildings at Calgary and Edmonton from present indications.

Exactly what troops will winter at each place has not as yet been decided. It looks like the 56th and 82nd for Calgary. However, and the 1st, the 63rd, and the 66th for Edmonton, with probably the early departure of the 51st overseas. It is next in turn. The 13th will winter at Red Deer.

It does not seem likely that the plan of the militia council to billet troops in the smaller towns if they can guarantee a certain number of men will disturb the smoothness of arrangements much in the province. A

few applications have been received from isolated towns, agreeing to raise the necessary number, but so far none have worked on the scheme, and deliberately raised a sufficient number for present units to justify setting the machinery in motion.

MORE MEN AND YET MORE WANTED, ARE THE KING'S WORDS

London, Oct. 22.—King George has issued an appeal to his subjects to come forward voluntarily and aid Great Britain in her fight against the German allies.

"More men and yet more," his majesty says, "are wanted to keep my armies in the field, and through them to secure victory and an enduring peace."

The message of the king, issued by the Press Bureau this evening, says:

"To my people: At this grave moment, in the struggle between my people and a highly organized enemy who has transgressed the laws of nations and changed the ordinance that binds civilized Europe together, I appeal to you.

"I rejoice in my empire's effort and I feel pride in the voluntary response from my subjects all over the world, who have sacrificed home and fortune and life itself in order that another may not inherit the free empire which their ancestors and mine have built. I ask you to make good these sacrifices.

"The end is not in sight. More men and yet more, are wanted to keep my armies in the field, and through them to secure victory and an enduring peace. In ancient days the darkest moment has ever produced in men of our race the sternest resolve. I ask you men of all classes to come forward voluntarily and take your share in this fight.

"In freely responding to my appeal you will be giving your support to our brothers who for long months have nobly upheld Great Britain's past traditions and the glory of her arms."

ENLISTMENT UP TO STRENGTH IN CANADA

Ottawa, Oct. 21.—Although the total enlistment is now practically up to the authorized establishment of 164,000 men for expeditionary service, the militia department is allowing recruiting to go on without regard to the formality of a government authorization or a call for another fifty thousand men or so. It is probable that this authorization will be formally made before long bringing the total authorized establishment of the expeditionary forces up to 200,000. Meanwhile recruiting is proceeding satisfactorily, and the department is in daily receipt of notifications from many small communities throughout the Dominion, stating that local units of twenty-five men or more are being raised, and asking for arrangements for billeting and training during the winter.

The recruiting movement is reported to be especially strong in the west, and the minister of militia will make an inspection trip through to the Pacific coast probably toward the end of next month.

The announcement from the militia department that towns and villages recruiting up to a minimum of 25 men will be allowed to quarter the men so raised during the winter until such time as they are required, has met with a wonderful response.

Esquimaux Oil and Asphalt Co. Now Ready to Catch Suckers

(Do Not Allow Outsiders to Sting You—We Can do it Here)

As so many get-rich-quick artists seem to be making money out of the festive public, without much hard labor or mental strain, the editor of the Western Globe is going into the business himself. The money we receive on our proposition will be of great use to us, as we are fed up on hard work in the attempt to make an honest living.

The Esquimaux Oil and Asphalt Co. is sure to prove, the only money-maker in the great northern oil fields. If you don't believe it we are willing to show you a tame anticline, also some crude petroleum which we have received by express from Petrolia, Ont. The oil we are sure of getting in thousand-barrel lots from our proposed well, when we put it down, is presumed to be almost of the same composition as that of the famous Ontario field. From the evidence of oil experts, Archie McConachie and Wm. Tees, men with wide experience in gasoline and oil works, we have come to the conclusion that if we can strike oil it will be a good thing, as at the present time most of the oil used in Alberta has to be imported, and thus by having our oil well situated in Alberta the long freight haul will be eliminated and the extra money will go into the pockets of our shareholders. Everything points to the fact that the Esquimaux Oil and Asphalt Co. is going to be a success. On the proposed site there are seven real anticlines, two mud volcanoes, and the strata of earth underlying is composed of highly carboniferous calcium carbonate and lime, with a slight percentage of pure castor oil and hair oil, which, in the opinion of the best legal talent we can procure, should produce something tangible. As the expert has informed us, we have several chances to make a success of this venture, because so many different things are indicated by the contour of the land in the immediate vicinity. Should we fail to strike petroleum, we are sure of a good supply of castor oil, although we are doubtful of this, as the well is so far from Castor. Another thing—a very valuable by-product of our well—is calcium carbide, used to a great extent for lighting purposes, and which we will be able to place on the market so cheaply that it won't matter a darn whether we strike oil or not. There is also a chance to strike a vein of hard coal or galena ore, either of which would make a paying proposition. The McDermaid Drug Co. has signified its willingness to take over all the hair oil we can produce at a good figure (i.e., b. Lacombe).

BUT—We are short of money at the present time, and that is where you, gentle reader, are expected to come forward with your hand in your pocket and a broad smile on your face. The shares are \$11.57 par value, but as an inducement for you to buy we will give them to you in bunches of one thousand at 1 cent per share, and as an additional inducement will chuck in eight thousand shares of common or unsecured stock, which you are at liberty to unload on your friends whenever the occasion arises. This is a strictly business proposition, and we hope it will be looked upon as such. As we said before, we need the money in our business. Now, come right up and buy your dose of shares in the Esquimaux Oil and Asphalt Co. We will guarantee that your returns will be just the same as your returns from another fake concern at the present time selling shares in this district.

And, remember, when dealing with us you are dealing with a person who is known to you, and whose sole aim in life is to look after your welfare, and see to it that when you are old you will have a nice little roll of oil shares to take out of your trunk

and look at. Send all money to the editor of this paper. Cash preferred, but cheques will be taken if war stamp is on them.

Our geologist has reported as follows:

Dear Sir,—As requested, I have looked over your drawing of the contour of the land in the vicinity of your proposed oil well. I am surprised to note that you have the best anticlines I have yet seen, they being well developed and in a good state of preservation. Of course, having lain on the ground so long, and being constantly exposed to the elements, they show signs of wear, but this can be overcome by the photographer in making the pictures for your prospectus. You have the right idea of anticlines, and your drawings are true to life. With those anticlines, without taking cognizance of the fact that you have put in three mud volcanoes, I am sure that you will strike oil on your property if you go down far enough and happen to hit the Dakota sands after passing through the Mexican formation. Oil is sometimes found in the Dakota sands, but in Alberta I have had greater success in locating the fluid in the vicinity of a Standard Oil storage tank. I would advise you to shift the second anticline a little to the west, as it will interfere with the setting up of your rig, and four anticlines should be sufficient, anyway, and you have the mud volcanoes to fall back on. From the samples of earth you have shown me, I should say that oil will be struck, and if not, the various minerals in the earth should pay you. I notice considerable radium in the parcel, which, when mixed with hot air, will have the effect of stimulating the separation of money from the bank accounts of your prospective clients. Yours truly, Augustine McDermaid, F. R. G. S.

Some Boquets for Mr. Bulyea

The appointment of ex-Lieut. Governor Bulyea as chairman of the Alberta Utilities Commission strikes the average man as one of the greatest jokes ever perpetrated on an unsuspecting public. Mr. Bulyea has proved considerable of a false alarm at anything he attempted prior to his appointment as Lieut. Governor of Alberta as a reward for political work. As Lieut. Governor he has never failed to sign receipts for his salary, and made the job a great success—his first success.

The Calgary Albertan can stand for almost anything that is Grit, but the appointment of Bulyea as chairman of the Alberta Utilities Commission has got the editor's goat. In a recent issue says:—

"The choice made by the government of members of the Utility Commission is only partially satisfactory. Such a commission should have as chairman a man of exceptional business experience and administrative success. It surely cannot be said by the government or by the friends of Mr. Bulyea that he is that kind of a man. He has not had the kind of experience which qualifies him for such an important post. He has not been conspicuously successful in his commercial undertakings. He was a storekeeper for a time, then a commissioner of agriculture in the old territorial legislature, and for a short time commissioner of public works. In nothing has he shown outstanding business ability."

The News-Telegram makes the following remarks on the appointment of Bulyea to the chairmanship of the Alberta Utilities Commission:

"The expected has happened even sooner than was anticipated. The FIRST official act of Alberta's new lieutenant-governor was to sign an order-in-council appointing the late lieutenant-governor chairman of a Utilities Commission, with two other members and a secretary. It would probably have been unprecedented, but it is really a wonder that Dr. Brett did not balk at his first job, or postpone it for a few days at least. Of course it would have been a downright shame to have put ex-Governor Bulyea to the inconvenience of being off the public payroll for a day; his princely salary for one berth had to start the mo-

ment it ceased for another. The Hon. Arthur Lewis Sifton looks well after his own. But why did he not appoint a chairman with some knowledge of utilities, if he really wanted a \$10,000 a year chairman at a time when Alberta has about as much need for a man in the job as he is going to occupy as has a city like Calgary for a governor? The appointment of Bulyea is about the last straw so far as the Sifton government is concerned."

The Calgary Herald says, with reference to Bulyea's appointment:—

"Judge Carpenter, on the utilities commission is a man of bright legal mind. Mr. Stocks is a gentleman with a wealth of practical experience, and Mr. Bulyea has a record for doing nothing in particular possibly better than any other man who has ever served the people in western Canada, which shows that a worse combination for this new board might, easily have been made."

THE IMPORTANCE OF GRAIN SCREENINGS

Weed-seeds made up 16 per cent. of the total weight of a car of western-grown flax. A sample representing over 25,000 bushels of wheat contained only 92.6 per cent. by weight of pure wheat, the remainder being largely made up of weed seeds. Such are the statements embodied in a pamphlet issued by the seed branch of the department of agriculture at Ottawa and that can be had gratuitously by addressing the publications branch of the same department. The pamphlet is entitled, "Grain Screenings," and R. Dymond, B.A., seed analyst, is the author, he having been assisted in the work by E. S. Archibald, B.A., B.S.A., Dominion animal husbandman, and F. C. Elford, Dominion poultry husbandman, who contribute "Results of Feeding Experiments" at the central experimental farm. These are given with elaboration of detail that add much to the pamphlet, which the dedicatory announcement truly says "is of importance to all concerned in the production, handling and uses of grain and its products."

The heads of the different sections into which the pamphlet is divided are: Composition of Screenings, Uses of Screenings, Grinding Screenings, Screenings in Feeding, Stuffs, Flaxseed Screenings, and Feeding Experiments. The last-mentioned were made most thoroughly with cattle, sheep, swine, and poultry and the conclusions reached are elaborately tabulated. The importance of proper screening to the grain grower, thrasher, miller, and feed manufacturer, is minutely detailed and a summary given, in which it is set forth: That the material removed from grain at terminal elevators consists of shrunken and broken kernels of wheat, oats, barley, and flax, besides varying proportions of a very large number of weed seeds.

That up to the present, most of the screenings from our terminal elevators have been exported to the United States, where they have been reclaimed and used in various forms for feeding livestock.

That on account of the extremely small size of some, and the hard, flinty seed-coats of others, the complete pulverization of all of the weed seeds in screenings cannot be accomplished by an ordinary chopper. That screenings reclaimed over a one-fourteenth inch perforated zinc screen to remove the finer weed seeds (black seeds) may be satisfactorily ground by ordinary choppers, is reasonable, care is taken in the separation and grinding. That feeding stuffs manufactured from screenings, not properly reclaimed, sometimes contain thousands of vital noxious weed seeds per pound. Such material should never be fed as it is liable to the loss of thousands of dollars.

That feeding experiments have proven that the black seeds are useless and expensive as adulterants. Their admixture in any considerable quantity to other feed makes it unpalatable for all kinds of stock.

That screenings without black seeds may be fed freely to horses, cattle, sheep, or swine, but it is more profitable to have such screenings composed not more than 50 to 60 per cent. of the total grain ration. Buckwheat screenings are especially valuable as poultry feed.

That more attention to the cleaning of grain as it is threshed will save the cost of transporting the screenings to the terminal elevators, and will leave the grower in possession of much valuable feed which, if he does not need for his own use, will find ready sale among livestock men.

That the growth of weeds entails an enormous loss each year to farmers, and while it is desirable to utilize everything in grain screenings of good feeding

SHARP ATTACK REPULSED

Dangerous Canadian Rumor Just by Fred J. Caven.

For two years, I was a victim of *Acute Indigestion and Gas in the Stomach*. It afterwards attacked my heart, and I had pains all over the body, so I could hardly move around. I tried all kinds of medicines but none of them did me any good. At last, acting on the advice of a friend, I decided to try *Fruit-a-lives*. I bought the first box last June, and now I am well, after using only three boxes. I recommend *Fruit-a-lives* to anyone suffering from indigestion, no matter how acute. FRED J. CAVEN.

Simple indigestion often leads to *Heart Attacks, Catarrh of the Stomach and constant distress of mind and body*. If you are bothered with any Stomach Trouble, and especially if Constipation troubles you, take *Fruit-a-lives*. Box, 6 for \$2.50, trial size, 25c. At all dealers or sent postpaid by *Fruit-a-lives Limited, Ottawa*.

L. C. CHARLESWORTH SUCCEEDS STOCKS

Premier, Sifton announced to the Bulletin, last night the appointment of L. C. Charlesworth, C.E., as deputy minister of public works for the province, in succession to John Stocks, who goes to the public utilities commission.

The appointment is exceedingly popular with the employees of the department and the civil service generally. Ever since the formation of the province Mr. Charlesworth has acted as director of surveys, and has also acted as deputy minister during the frequent absence of Mr. Stocks.

Previous to coming to Edmonton he served for two and a half years as district engineer under the old territorial government, with headquarters at Medicine Hat. Before coming west he was mining lands agent for five years in the Lake of the Woods district in Ontario.

BRITISH GRAND FLEET WILL DECIDE THE FATE OF THE WARRING NATIONS

London, Oct. 20.—"Germany aims at world domination, and against world domination the British fleet from the time of Queen Elizabeth to the present day has always been found the surest and most effectual protection," is the contribution of A. J. Balfour, first lord of the admiralty, to the Naval League's symposium in connection with tomorrow's observance of Trafalgar Day.

Winston Spencer Churchill, ex-first lord of the admiralty, and at present chancellor of the Duchy of Lancaster, writes in part: "For six months no hostile flag has flown outside the Baltic. We are stronger than ever, and incomparably better adapted for war conditions. The great strategic conclusions on which our naval dispositions are based have been vindicated. From its shrouded throne amid northern storms, the grand fleet dominates, and will finally decide, the fate of the warring nations, and by that formidable combination, strength and patience, will secure the victory of our just cause."

HUGHES HAS NO USE FOR THE MAN WHO IS A DRINKER

Ottawa, Oct. 21.—Major-General Sir Sam Hughes was the feature of the Ontario Women's Temperance Union Convention on Wednesday, the minister of militia dropping in to visit his friends and getting an enthusiastic reception.

"I have absolutely no use for the man either in uniform or out of uniform who is a drinker," said the minister, in the course of a brief address. He commended the work the W.C.T.U. is doing toward providing comforts for the soldiers at the front.

The minister of militia went on to state that the absence of the canteen in the Canadian camps had demonstrated beyond a doubt that the man who did not use alcohol in any form was much the physical superior of those addicted to intemperance during the force of march.

THE FUTURE OF CANADA

In fifteen years the population of Canada will have doubled, and in about fifty years the population may be as great as that of the United Kingdom. These are some of the forecasts made by Mr. D. A. Thomas, representative in Canada of Mr. Lloyd George, British minister of munitions. Mr. Thomas spoke as a close observer, and not as a professional optimist.

A close comparison of the figures of the Canadian census and the forecast of the British observer with the census figures of the United States reveals a very striking similarity.

On the first census, after the Declaration of Independence, the population of the United States was 3,929,214. On the first census after Confederation, the population of Canada was 3,689,267.

At the census in the United States taken 45 years after the Declaration of Independence, the population of the United States was 9,638,463. At the census taken 45 years after Confederation, the population of Canada was 7,206,643.

Mr. Thomas believes that our population in 1931, which will be 64 years after Confederation, will be double our present population, or about 17,000,000. The population of the United States in 1840, which was 64 years after the Declaration of Independence, was 17,093,702. Mr. Thomas estimates our population in 1965 at Britain's present-day population, or 45,370,530. The population of the United States one hundred years after its creation was between 38,000,000 and 50,000,000.

Mr. Thomas' estimate is very reasonable. The economic position of the Dominion at present, he thought, was better than it was before the war, and it was certainly better than it would have been had the war not come. Until the end of the struggle, the general position would become increasingly better.

As to conditions after the war was over, Mr. Thomas said they would depend somewhat upon its length, and the exhaustion of the belligerents. He believed that within a comparatively few months after the war, as after the Franco-Prussian conflict, would come the greatest trade activity of several generations.

In Canada, with the cessation of munition manufacture and war orders, there might be several months of depression, to be followed by great prosperity, since the Dominion would be called upon to supply Europe, while her trade, especially with Great Britain and Russia, was certain to greatly increase. The development of Canada was at only its beginning.

The period of depression, he thought, was inevitable, and would be caused partly by the cessation of war orders and the interval which would elapse before ordinary business orders would be given.

Mr. Thomas predicted heavy immigration from European countries to Canada and to the United States. Immigration would turn westward, largely because of the war and resulting conditions.

TIME RIPE FOR U. S. TO TAKE OVER ALL THIS HEMISPHERE

Buffalo, N.Y., Oct. 20.—The time is ripe for the United States to ask European countries to relinquish possession of their colonies on the western hemisphere, in the opinion of Charles H. Sherhill, former United States minister to Argentina, who delivered a remarkable address along this line before the University of Buffalo today.

The speaker did not make it entirely clear whether he would include Canada in the bargaining for independence. Mr. Sherhill spoke more particularly of freedom for the Guianas, British Honduras and such colonies.

NO VOTES FOR WOMEN IN STATE OF NEW JERSEY

Jersey City, N. J., Oct. 20.—The majority which New Jersey rolled up against woman suffrage grew today with the steady dribble of belated returns. Figures still incomplete presaged a verdict against "votes for women" of not less than 55,000 majority out of approximately 350,000 votes cast at yesterday's special election. In all of the 24 counties in the state apparently only Ocean County honored the women with a majority.

LIBERAL SENATOR DEAD

Hon. James Edwin Robertson, Liberal senator, died at his home in Montague on Wednesday evening last, aged 75 years. He had been ill with paralysis for about two years and absent from the senate two seasons, his seat being declared vacant last year.

Why Sir Edward Carson Left the British Cabinet

London, Oct. 20.—Coming direct from Buckingham Palace, where he handed to King George the seals of his office on his resignation from the cabinet, Sir Edward Carson appeared in the house of commons today and set at rest all conjecture regarding the reasons for his retirement.

Rising from his old seat on the front opposition bench, the former attorney-general in a few words made the house conversant with the cause of the ministerial crisis which he said was due entirely to the fact that he found himself in complete variance with the cabinet on questions of the Near Eastern policy. He felt, therefore, that his presence in the cabinet would be a source of weakness and not strength.

Sir Edward added that he never had the slightest personal differences with any of his colleagues. After expressing regret at the absence of Premier Asquith, and stating that for this reason he would give a briefer explanation than he had intended, Sir Edward Carson said:

"I am well aware of the difficulties under the existing circumstances of making any full statement or of saying anything that might be taken hold of as showing any signs of weakness or divergence in the main object we have in view—or carrying the war at all sacrifices to a final and conclusive issue. I need hardly say that upon that issue there is not and never has been either in the cabinet or in this house or in the country any disagreement or divergence of opinion.

"The real unity which the country wants is that steadfast unity of purpose to defeat our enemies and to save our country, and I entirely deny that the fact of holding a divergent view as to the best policy and methods to adopt in the various war theatres in order to bring it to a successful conclusion is in any sense an element of disunion.

"I have seen criticisms of myself and reasons for my resignation of a very petty and malicious character, attributing the motives to a party and political nature.

"I do not desire to deal with these ridiculous assertions except to say now, in the presence of many of my late colleagues, that since I entered the cabinet I never heard a word of discussion or dispute on those party questions which divided us before the war. In every cabinet meeting I attended we all devoted our energies wholly and solely to the discussion of questions which arose with reference to the prosecution of the war.

"I also desire to say that during the whole time I have been in the cabinet I never had any personal differences either with the prime minister, whose unvarying courtesy I desire to acknowledge, or with any one of my late colleagues. May I also add that no one realizes more than I the great difficulties under which we labor owing to the fact that our policy and methods must at all times be adopted in concert and co-ordination with our various allies, and must also very frequently be framed with a view to consulting sentiments and feelings in those neutral countries with whom we remain on friendly terms? This often has been lost sight of by critics of our actions, who cannot possibly know the difficulties which arise from time to time.

"Difficulties, which have arisen in the eastern war theatres have created a situation which, to my mind, must necessarily lead to far-reaching results.

"I have expressed very strongly, and I hope the house will believe, conscientiously and patriotically, I did not think that in the circumstances I could be anything but a source of weakness at a time requiring great strength and consistency. That is all I can say and I ask the house to believe that in the course I have taken I have been actuated by no personal party motive, but that I have acted to the best of my ability, solely in the interests of my country."

This Oil Share Fakir Got a Little Peeved..

This week we were called upon by a gentleman who is peddling oil shares to our citizens, and who took exception to a few remarks we made last week, with reference to gentlemen who make a living by gulling the public. He was exceedingly warm when he arrived at the office, but after gazing for a moment into our fiery eyes calmed down. He remarked that we were a damfool to work for a living when we could just as well make our fortune by getting in on a good oil company. He said it was the easiest thing imaginable to sell oil stock, and outside of a board account all the money a fellow got was clear profit. He referred to so many citizens of this district who were already members of his company, and said he had prospects to land a lot more. It was the intention in this particular case to boost the stock a little, and so let those who were already stuck have a chance to pull out even. He said several residents of the district were helping him out on the scheme.

He also informed us before leaving that if we said anything more about his get-rich-quick scheme, that he would sue us for damages, as he had a reputation to sustain. (Just here we laughed hilariously). He also said that the remarks in the paper would not do him any harm, and informed us that some of the residents of the district said we were a knocker of everything good—such as electric railways, iron foundries, etc., and that we had prevented the Town of Lacombe from becoming one of the greatest manufacturing centres on the continent. He had met people like us before but not very often, as he did not make a habit of travelling in that kind of society. (We quietly agreed with him on this point, which only appeared to make him warmer). After telling us a little of his family history, and showing us samples of oil he started to take his leave, assuring us that vengeance would be his if we said anything more about oil.

We then detained him a moment while we recited a few incidents in his career, and backed them up with reports from Edmonton, where he has worked the public for a considerable time. We also informed him that of all the fake schemes it had been our pleasure to meet, his took the bakery. It did not have one redeeming feature. It had no money and no prospects. It had no oil in sight. Its only available asset was himself, and that every cent of money that was going into the "prospect" was for his benefit alone. We told him that we admired the nerve of anyone who at the present time would try and sell oil shares in Alberta. This was his only redeeming feature. He was surely there with the nerve stuff, although he didn't look the part.

And, in spite of this gentleman's threat of dire trouble, we again say that this up-north oil scheme is the veriest kind of a fake. Those who are peddling the stock are aware of this fact, and we dare the gentleman who is head push around here to deny that he did not say that he was attempting to boost this stock a few cents with the intention of unloading a bunch he had got some months ago practically for nothing.

Now, if he is ready to go into court, he can find us any day at our office, Barnett Avenue, Lacombe. But fakirs of his stamp are easy marks when you think it over, and we do not anticipate any trouble.

NO ARMS FOR MEXICO

President Wilson, on Thursday, declared an embargo on the shipment of arms and ammunition to Mexico.

Clive News

B. F. Allison unloaded a car of Nevias coal this week.

T. E. Horsby moved into his new residence on Main Street last Saturday.

Mrs. H. B. Scott, of Calgary, has been visiting with her parents, Mr. and Mrs. B. F. Allison.

Miss Madge Smith of Lacombe, who has been visiting with R. W. Ash, returned to her home on Friday.

Mrs. J. H. Salton and two children, accompanied by Miss Johnson, of Mirror, left on Monday for Red Deer.

Mr. A. E. Kocher, of the U. S. Department of Agriculture, Bureau of Soils, Washington, D. C., accompanied by his wife, is here on a visit to his brother, W. H. Kocher and family.

Rev. Holdom, of Mirror, will hold harvest thanksgiving service in the English Church, Clive, on Thursday afternoon, Oct. 28, at 2.30 p. m. Everybody welcome.

The Clive Honor Roll has had two more names added to the list this week in the persons of John Kennedy and David Miller.

On Tuesday, October 12th, a very quiet wedding took place in the Wesley Methodist parsonage, when Miss Adeline McNeil and Mr. Norman Barker, both of Calgary, were united in marriage by the Rev. Mr. Farrell. After a honeymoon spent in Edmonton and other northern points, Mr. and Mrs. Barker will reside in Calgary. The bride, who is well known in Clive and district, will have the best wishes of her many friends for a long and prosperous wedded life.

Miss Pearl Reynolds is visiting with friends in Calgary.

Miss Inez Lawson, of Tees, spent a few days visiting with Mr. and Mrs. H. M. Williams.

Mrs. Lawson, of Tees, who has been nursing her daughter, Mrs. F. E. Allison, returned to her home on Saturday.

The Ladies Aid was very pleasantly entertained at the parsonage last Thursday. The hostess, Mrs. Bradley, was assisted in the tea room by Mrs. Vanderzyl.

Alex. McMath, or better known as "Shorty" who has been assistant at the Quebec Bank here for the past three years, has been promoted to Herschel, Sask.

Ponoka News

Mr. and Mrs. Thomas Thompson, of Bankhead, arrived in our midst on Wednesday. They have gone out to their farm in the Usona district, and intend to settle down to farming.

R. M. Whitecotton has become the proud possessor of an automobile. Nothing slow about Bob, and he has become a prime favorite with the ladies. To see him drive around surrounded by half a dozen is enough to make an ordinary man green with envy.

Ponoka constituency has been called upon to raise \$3,500 for the Patriotic Fund. Can this be done? Certainly it can, by united effort, and the aims of the Fund being laid before the people, the money will be forthcoming. Professional men, business men, farmers, women and children can all make a little sacrifice and thus help the wives and children of the boys who are fighting the Empire's battles in this terrible war.

THE TABLES TURNED

The splendid work now being done by British submarines in the Baltic will perhaps suggest to Berlin that one can play at what Germany at one time seemed to think was a splendid game, but about which she does not now seem to be so enthusiastic.

There is one difference between the British and German submarine tactics, and that is in the treatment of the crews of the crews of destroyed merchantmen. We all know how in the beginning of the war the German submarines used to sink trawlers and cargo vessels, to say nothing of passenger liners, without warning. But reports from the Baltic state that crews of destroyed German vessels were first permitted to escape.

The British maxim that inoffensive civilians of enemy states should not be needlessly slain will, we believe, triumph in the end. In the house of commons the other day Under Secretary for War Tennant said that the British air service was designed for the purpose of offensive and defensive attack on the enemy's forces, not for the raiding of peaceful towns and the murder of enemy civilians. Germany's record in this same connection needs no repetition here.

It all comes back to the same story of the conflict of the British and the Germanic races. The two are absolutely and inevitably different, and if by any chance the latter should prevail it will be a bad day for the rest of the world as well as for the losers in this war.

Citizens Robbed By an Alberta Oil Share Fake

The biggest sucker game that has come to our notice lately is the peddling of shares throughout this district in an imaginary oil company in Alberta. Many of our citizens have been inveigled into putting money into this concern, with as much chance of getting any returns as Kaiser William has of getting to Heaven. If our citizens want to buy oil shares it is their own business, but as most of them have not the time to look into these schemes closely, and as a rule invest on the advice of the man who is selling the shares, The Western Globe has done a little investigating for them. This latest proposition is a sucker game from start to finish. The men who are pushing it are adepts at working the game, and are of the purely get-rich-quick stamp. All they have to show the investor is a photo or so of a wild and mountainous country, with a few men straining mud through their fingers (crude oil), and a few bottles of kerosene

and gasoline. We can get up a set of "samples" just like them in fifteen minutes, and not go out of the printing office. They have done little in the way of developing their alleged oil field; they have not the money to develop anything; their total ability in the way of producing anything but "hot air" is nil. The person who is foolish enough to take any of their shares for real money will never get the slightest return on his investment, and after sober thought we are sure these investors will come to this conclusion themselves.

There should be law under which oil share fakirs of this stamp could be arrested and sent up where they could do hard manual labor for a few years. They then might make good citizens of the Province.

In the meantime it is up to our citizens to turn these peddlers down with a dull, sickening thud, and give the money they were thinking of investing to the Patriotic Fund.

Russian cavalry charging the Germans at Podcherevitche, west of Rafalovka, in the recent fighting, broke through their lines of defenses and overrode the trenches inflicting heavy losses and seriously interfering with the evident plans of the Germans to dig in along the Sty river for winter quarters.

A. P. Ross, one of the oldest residents of Cornwall, is dead, after a short illness, aged 83 years. He was a veteran of the Fenian raid of 1866-70.

The Russian Government is preparing for the early issue of an internal loan of one billion roubles (\$500,000,000). The interest rate will be 5 1/2 per cent. The loan will run for a short term.

The organized wireless operators of the Atlantic coast have voted for a general strike unless their demands are granted, according to the announcement made on Thursday last by Secretary Schnatznitz. The demand is for an increase which will raise the scale \$30 to \$75 a month.

Unreserved Public Sale of Livestock

On Wednesday, Nov. 3, 1915

100 Head of Cattle at Public Sale, Wed., Nov. 3rd, 1 1/2 miles West of Lacombe

Having received instructions from the Owner, who is going into the Pure-bred cattle business, I will sell at Public Auction WITHOUT RESERVE the following described high-grade Shorthorn Cattle:

4 Head of choice 3-year-old Heifers. Will be fresh in a few days. Will make fine winter cows. 11 Head of good Milch Cows giving milk at present. 25 Head of choice Breeding Cows, 3 to 6 years old. 30 Head of fine Spring Calves. All sired by a registered Shorthorn bull. 25 Head of yearling Steers and Calves.

The above list comprises one of the good herds of grade cattle in this district. They are all in good thrifty condition and free from disease of any kind. Every cow in the herd has produced a calf this year and is supposed to be safe in calf again to a pure-bred and registered Shorthorn bull. If you are interested in good cattle and want to buy one head or a car load it will be to your interest to attend this sale. Don't forget the date and arrange to be there at one o'clock sharp.

TERMS—A credit of six months will be given on approved joint bankable note bearing 8 per cent. interest. 5 per cent. discount for cash.

C. F. DAMRON, Auctioneer

ED. BURKE, Owner.

JESSE FRASER, Clerk

Gull Lake News

Keith Siler and Cecil Poling left for Cayley, Alta., on Sunday morning. Keith has been visiting at home since Wednesday owing to a snow-storm suspending threshing operations for a few days.

There was a goodly number at the H. H. S. on Wednesday. Mrs. Miller had a quantity of discarded clothing ready to be made into clothes for the needy, and to judge from the large pile of finished garments the ladies made record time with the work.

On Halloween night, by dim candle light, The wheel of fortune will turn. If both old and young will attend.

To this summons I send Their true fate may learn. Gull Lake School-house Monday, Nov. 1, 8 p.m. Come in disguised array Or a big fine you must pay.

Rimbey News

The local U.F.A. are getting a car-load of apples, which are expected to arrive this week. Any one wanting apples please communicate with Harold Eckhardt, or Mr. Frank Symonds.

Mr. Pat Donnelly, who had been laid up with lumbago for several days, returned to work his threshing outfit last Monday.

Jos. Marshall and son marketed two car-loads of cattle last week. One load was sold at Lacombe. Jos. Marshall accompanied the other load to Calgary, where they were disposed of.

Archdeacon A. J. Dewdney conducted services at the Anglican Church last Sunday.

Last week was a busy week for the ladies of the local Red Cross Society, who conducted a house-to-house canvass for the benefit of the sick and wounded soldiers and sailors at the front, with a result that \$130 was raised. \$24 was realized at the concert on Thursday evening. The balance was collected by the ladies, who are very grateful for the liberal support given them. The children from the Symonds School contributed \$2.50; the Rimbey School \$3.00, which speaks well for the patriotism of the children.

Mrs. F. Richards and Mrs. K. Waters and little daughter Marjory, were Lacombe visitors Friday and Saturday.

John F. Miller, optometrist, of Calgary, was here several days the past week plying his business.

Mrs. McEvoy has returned from Wisconsin, where she was called several weeks ago by the death of her father.

A cordial invitation is extended to all teachers to attend a meeting of the Rimbey Teachers' Association on Nov. 6th.

During the past week Mr. R. H. Cautley, D.L.S., has surveyed land for the purpose of the registration of a township.

The subdivision includes 38 acres lying north and south of the main street and includes the present business and residential properties in that thoroughfare. It is bounded on either side by land owned by Messrs. J. & S. Rimbey. The matter of a township has long been delayed. All that is now needed is a railroad to give Rimbey a chance of competing as an agricultural centre with any part of the province.

Bentley News

Threshing is progressing finely, nearly all of the stock-threshing being finished. About three weeks more of nice weather will see most of the machines finish-

ed. Fall plowing is also progressing well.

The supper given by the Ladies Aid, on Friday night last, was attacked by a large force of Allies. The desperate charge on the chicken pie, by a detachment of our Home Guards, showed how well they were preparing themselves against any attack of hunger for some time to come. The entertainment following was well prepared and rendered.

Things are quiet along the lines, in the Bentley District. A few of our worthy citizens have a touch of the war fever, but are kept up and around by their wives.

We hear that the Lacombe and Blindman Valley Railway Co. have went bumped. The next thing in order is for another delegation of citizens to visit the Premier at Edmonton and prevail upon them for the need of this District and the protection of the provincial money already tied up in this district, to find some corporation to take this over and complete and operate the same. This Valley needs the road now, worse than ever, as the grain, stock and produce to be shipped out of this district is greater than ever, and war-times does not effect a railway's earnings capacity.

Mr. J. Arthur Davies is getting on nicely in the school here, and is getting a real rugby team out of the little boys here.

We are thinking of playing senior hockey in Bentley this winter, "senior" as far as the old men on the team is concerned.

In order to show you our stock of Groceries we will give a 10 per cent. discount on Saturday next. This includes flour and sugar, and a special prize for the largest cash order. McPherson Grocery.

Red Cross Notes

The Red Cross sewing meeting will be held at the home of Mrs. R. J. Scott on Friday afternoon at 2 o'clock.

Red Cross Notes

Mrs. Tett has received the following acknowledgment from the head office of the Red Cross Society, Calgary:—"I beg to acknowledge, with thanks, the receipt of the splendid donation of \$103 from the Lacombe Branch and note that you wish it used in the following way: \$50 for medical supplies, \$50 for the special collection for the British Red Cross Society on Trafalgar Day, and \$3 for one dozen Red Cross brooches. We quite understand your difficulty in taking up a collection on Trafalgar Day. We have the same trouble in Calgary, but are glad you were able to make a special donation for this fund, as the calls on the British Red Cross Society are enormous, and we are so anxious that a really large contribution may be sent by Alberta. With congratulations on the work of your branch, Yours sincerely, M. Pinkham, Hon. Sec.-Treasurer."

Village of Bentley

PUBLIC NOTICE is hereby given that there has been introduced in the council of the Village of Bentley a by-law of which the following is a short synopsis: "That all live stock be restricted from running at large inside the village limits from November the first until May the first of each year," and that a copy of same may be seen at each of the following places: Post Office at Bentley, Putland & Thorp's store, also at the office of the Sec.-Treas.

AND FURTHER, that unless within thirty days of the publication of this notice at least ten resident electors of the Village petition the council to submit such by-law to a vote of the resident electors of the Village, the council will proceed to pass same. HERBERT THORP, Sec.-Treasurer, (O. 27-1c) Village of Bentley.

Every Apple Has Its Season; Eat it Then--You'll Taste the Reason

Buy British Columbia Apples for Hallow'een

When the boys and girls, and the grown-ups too, duck their heads into the tub for Apples on this night of pranks and fun, make sure that they get an Apple Grown in British Columbia. To bite into a B.C. Apple will be a prize well worth the ducking.

THE JONATHAN

This Apple, grown so well in B.C., is medium-sized; has a dark red brilliantly striped skin, with small whitish dots. It has white flesh, a tender juicy texture, and has a sub-acid and aromatic flavor.

It is a popular Apple, both for eating and cooking. The supply is ample for all demands.

THE COX ORANGE

It is a small medium-sized Apple, mostly yellow with splashes of red, and is sometimes partly blushed with dull red. This is the highest quality Apple in the world, and commands the highest prices on Covent Garden Market, London. Its flesh is fine grained, and crisp, and is very juicy and highly aromatic.

Buy Them By the Box

Get a B.C. Booklet and become acquainted with these Famous Apples. It is sent Free by addressing W. E. McTAGGART, B. C. Fruit Markets Commissioner, 323a, Eighth Ave., West, Calgary, Alberta.

W. R. WINSLOW, Brand Reader. (O. 27-3c)

JUDICIAL SALE OF FARM PROPERTY NEAR RIMBEY, ALBERTA

Pursuant to judgment and final order for sale there will be sold by Samuel W. Paisley, in front of the Post Office in the Village of Bentley, Alberta, on Saturday, the 6th day of November, 1915, at the hour of one o'clock in the afternoon.

The Northwest Quarter of Section Twenty-Two (22), Township Forty-Two (42), Range Three (3), West of the Fifth Meridian, Alberta, excepting mines and minerals, and subject to the reservations and conditions in the grant from the Crown or in the existing Certificate of Title.

The vendors are informed that this property consists of 160 acres of good arable land. The soil is black loam with clay subsoil. The property is fenced on all sides with one mile of cross fencing. There is a good well on the property, 100 feet deep with pump. Thirty acres of said land is under cultivation this year. There are the following buildings on the said property: house 26 x 28, with a shingle roof; kitchen 14 x 14, frame, with a shingle roof, and two log barns with hay and sod roofs.

The property will be sold subject to a Reserve Bid. Terms of payment will be 10 per cent. cash on the day of sale, and the balance within sixty days thereafter without interest, or in the alternative 10 per cent. cash on the day of sale, the purchaser to give a mortgage for \$400.00 with interest at 8 per cent., repayable \$75 annually for the first four years and the balance of \$100 repayable at the end of the fifth year, and pay the balance of the purchase money into Court within sixty days after the sale without interest. Other terms and conditions are the standing conditions of the Supreme Court of Alberta as settled by the Master in Chambers.

Further particulars may be had from Messrs. Griesbach, O'Connor & Company, Solicitors, Edmonton, Alberta, or from Robert H. Inglis, Lacombe, Alberta.

Dated this 27th day of September, 1915.

J. I. POOLE, Clerk of the Supreme Court of Alberta, Wetaskiwin.

Approved: A. Y. B. (O. 13-3c) No. 14388

McTavish BUSINESS COLLEGE Edmonton

OCTOBER—There's no better month for a start in Business or Short-hand. Look ahead. It will likely take you six months to complete the course. Start now. Our work is absolutely thorough. A splendidly equipped school and 20 years' experience in our special lines mean something to you. Let us send particulars.

J. C. McTavish, Prin.

HOW TO MAKE A START
IN RAISING SHEEP

We take the following article, which will be of interest to anyone contemplating going into sheep raising, from the Grain Growers Guide:

For many years the best breeders of all the breeds have been striving to establish in their respective flocks the same ideal form of carcass, varied only in size. It will be necessary to have this ideal in view when making selections. A well-covered back is required, broad because of well sprung ribs, and wide loin, the flesh smooth and elastic to the touch—if in good condition, and not soft and blubbery, nor yet hard. In no case should the backbone be in evidence to the touch, if the animal is in good flesh. We should look for long, deep, full quarters, well filled in the twist, and inside and outside muscles of the thighs. In the points we have given we have the most valuable parts of the carcass. But in addition we require a good depth of ribs, good depth and width in front and at the heart, to give room for the vital organs, so we may have sturdy constitution. With these will go a medium length of neck, stronger at the shoulders and well set on.

We must be careful to select ewes with good firm bone, and strong, short pasterns, not set back too far, feet of fair size and good shape, the legs straight and set squarely under them. We must pay a great deal of attention to the wool also, in making selections. The heavy shearers—when the quality is right—of whichever breed we have, are the most profitable, and in order to get weight of fleece we must have density of fibres, as well as length of staple. It is of great importance to have it uniform in quality all over the body, not running to coarseness on the thighs.

After we have clearly in mind the type we want, then the thing of greatest importance to us is to have our selections uniform. There is profit in this because we can sell a uniform bunch of lambs to better advantage, and for a higher price. By uniformity more is meant than that the flock be of the same type, and similar in size. It means not only they look alike, but that the individual sheep be uniform in itself, that it has general uniformity, good conformation, not weak in places and extra good in others.

In selecting a ram, too, this individual uniformity is particularly important, since in this at least he is really half the flock, and with his better breeding is likely to reproduce his conformation and type in the lambs. A medium size will be found the most desirable, with an inclination to good size rather than undersize if varying any from medium. Roominess should be looked for in the ewes, as those of that form will be more likely to be good mothers. Avoid a ewe that is short in the ribs and has a "tucked up" appearance. In the ram we must have the same good qualities of carcass and of wool, and should look for more compactness and strength, in appearance a good lot of masculinity, a strong, bold carriage, stronger bone, and withal not any above the average size for rams of his breed. He must be pure bred and typical of the breed we have selected. It is almost invariably a mistake to cross, except for special purpose. Continuous indiscriminate crossing is always suicidal.

A flock of fifteen ewes should be the minimum on a farm of one hundred acres which is devoted to mixed farming. Such a flock can be increased with experience, but not beyond twenty to twenty-five, unless it is desired to make a special business of sheep raising. With good management and good care, an increase through lambs can be expected of from 150 per cent. to 175 per cent., and it should be the latter.

THE RIGHT KIND OF
COMPENSATION

Proceedings were begun in Chicago the other day in a rather novel damage suit, which will be watched with considerable interest by the people of this country. Cook county has recently placed on its statute books a dram-shop law, which provides that the wife or other dependent of a drunkard may notify saloonkeepers not to sell him liquor; if the notice is disregarded, the drunkard's family may sue the seller for impairment of their support. Under this ordinance suits have been entered for an amount aggregating over \$2,000,000 by William C. Dunn, attorney for the Citizens' League. According to Mr. Dunn, that law is the best weapon that can be used against the saloon. It will be seen, too, that there is a distinct compensation feature about it, though a remarkable circumstance is that the compensation happens to be for the victim. That was one phase of Chicago's liquor problem which was not enlarged upon by Mr.

Windle during his campaign in Atlanta. He was certainly strong for compensation, but he did not quote the law of his home county as a basis for compensation in this province.

PUBLIC UTILITIES BOARD IS
CHOSEN AS
FORESHADOWED

Edmonton, Oct. 21.—An order-in-council was passed last evening appointing Retiring Governor Bulley, John Stocks, deputy minister of public works, and Judge Carpenter, of the district court, Calgary, as the new public utilities commission.

G. H. V. Bulley is to be chairman at a salary of \$7,200, and the two other commissioners' salaries will be \$6,000 each. James Emmett Reilly, of Calgary, is to be secretary, and Mrs. Grace K. Tilley, widow of the late Andrew Tilley, stenographer.

The public utilities act was passed last session and is drafted along similar lines to that in Manitoba, with the addition of authority to regulate the borrowing powers of municipalities along the lines of similar legislation in Saskatchewan.

L. C. Charlesworth, C.E., has been appointed deputy minister of public works in succession to Mr. Stocks. Since the formation of the province Mr. Charlesworth has acted as director of surveys.

NEGRO SAYS HE SHOT
EDMONTON VETERAN
BY ACCIDENT

Edmonton, Oct. 21.—A detailed statement in which George Leek, a negro, admitted that he shot Noah A. Hoover, the 70-year-old reclusive and United States army pensioner, was secured by Supt. Wroughton, of the R.N.W.M.P. this morning. In this statement Leek said the shooting, which resulted in Hoover's death, was accidental. The statement covers two typewritten single-spaced pages, and in it Leek solemnly swears that he had no quarrel with deceased, and therefore would have no reason for killing him.

FLASHES FROM THE
WIRES

It is reported that the Central powers have decided to undertake still another campaign, this time against Montenegro. They will proceed from Sarajevo.

Advices from Athens indicate that Turkey and Bulgaria are undertaking energetic measures to oppose the land and sea operations of the Entente Allies in the Balkans.

The London Post advocates a small and efficient cabinet including such men as David Lloyd George, Sir Edward Carson, and Earl Kitchener "for the purpose of fighting Germany and not for the purpose of keeping two effete political parties in a state of animation."

One hundred persons were killed or injured in an explosion in a factory in Rue de Tolbiac on Wednesday afternoon last, according to a report received at the prefecture of police.

The Russian manifesto regarding Bulgaria concludes as follows: "The Russian people regard with sorrow the treason of Bulgaria, which was so dear to it until these last few days, and, with bleeding heart, it draws its sword against her, leaving the fate of the betrayer of the Slav cause to the just punishment of God."

Field Marshal von Mackensen's plans to be in Constantinople by December 1 became known from the orders of a German lieutenant now in Basel, where he is convalescing before rejoining his regiment.

A correspondent to the Chicago News says that in answer to Premier Venizelos of Greece, before his resignation, France promised 200,000 troops and Britain 150,000. This was not communicated to the king and led to the rupture with the king. Premier Viviani has wired his allies that the change in the French foreign office means no change in policy.

Alex. Khavostoff, minister of interior of Russia, says: "The Germans have got into a condition of utter exhaustion. They have really lost the war, and now will strive to put a drag on our activity and our production of munitions by stirring up strikes and causing confusion and disorganization in our means of transport."

A correspondent writing of the famous French drive, says that considering the immensity of the operations—at least 1,000,000 were engaged on both sides along the narrow front—it was amazing how apparently small had been the number of French casualties. Officers who had participated in the charge said the German losses had been heavier than the first official estimate and must have reached 150,000.

WILL PAY FOR THIS

The brutal shooting of Miss Cavell, an English nurse in the city of Brussels, by a German

officer, is likely to do more for the cause of recruiting through-out the Empire than hours of speechmaking. Thus is the intense wrath of the Hun turned into his own undoing.

Miss Cavell was found guilty of espionage and sentenced to die. Appeals by the United States and Spanish consuls were unavailing and a revision of her case by the emperor was denied. It mattered not that she had for months been freely nursing wounded German soldiers and giving the best of her life to the sacred cause of humanity. She had been found guilty and must die.

In Great Britain the other day a German woman admitted, on examination, that she was a spy and the British authorities sent her to jail for a term of years. In Brussels the English woman was blindfolded and led out to be shot at by a squad of "kultured" Hun soldiers. She fainted and fell and the officer in charge of the squad walked up to her prostrate form and fired a bullet from his revolver through her brain, saving the soldiers their unpleasant task.

No more coldblooded or heartless act has been recorded since the war began. It was such conduct as might have been looked for from some savage, barbarian tribe without a glimmer of civilization. That it will be avenged a thousand-fold before the war ends goes without saying. Britons will never permit so dastardly a crime against womanhood to remain unpunished.

FOUND GUILTY OF SPEAKING
SEDITION

Gustav Kohan was convicted by a jury in the criminal court, Calgary, of using seditious language when he said in a poolroom in Riverside that "Canadians would make good fertilizers," and that they were slaves in participating in the war. Mr. Justice Simons remanded him for sentence.

GERMANY WITHDRAWS
FISHING FLEET
FROM NORTH SEA

London, Oct. 21.—In consequence of the British fleet hunting German trawlers in the North Sea, especially on Dogger Bank, the Germans have withdrawn their fishing fleet from the North Sea, according to a despatch from Copenhagen to the Exchange Telegraph Company. As the result, the message adds, the price of fish in Germany is going up, and the price of fish in Sweden is rising in sympathy.

CAN POTATOES BE FED
WITH PROFIT TO HOGS

Potatoes are plentiful and hogs are a good price in Alberta, this year, which makes the following article, prepared by the U.S. Department of Agriculture, particularly interesting to western farmers just now.

"Potatoes, as a profitable feed for hogs, are receiving attention from agricultural experts. Department of Agricultural experiments indicate that 4 to 4½ bushels of cooked potatoes will add as much weight to hogs as a bushel of corn."

"During surplus production and consequent low prices it may be advantageous for the farmer to feed potatoes to his hogs rather than haul them to market."

"Potatoes are fed to best advantage when cooked or steamed and mixed with other feeds. Raw potatoes, fed alone, often cause 'scours.' On the other hand, in small quantities, they add succulence to the diet and may be beneficial to the pigs."

"In cooking potatoes for feeding hogs, only enough water should be used to make a mealy mash to prevent burning. The meal should also be mixed with corn meal or some other grain. Skimmed milk, tankage or meat meal probably adds to the usefulness of the feed."

GREECE NOT READY TO GIVE
HAND TO ALLIES

London, October 22.—Greece has declined for the present the Allies' offer to her of Cyprus and other concessions, territorial and financial, in return for her adherence to the Serbo-Greek treaty of alliance, which would mean her military aid to assist in meeting the Bulgarian and Austro-German attacks against her former ally.

The reply of Greece to the offer, which reached the foreign office tonight, is a lengthy one, and while it has not been made public there is reason to believe that the Hellenic kingdom bases its decision not to join the Allies on the ground that the Anglo-French forces landed at Saloniki is not, in the Greek government's opinion, strong enough for the task allotted it.

The refusal to accept the Allies' offer was not unexpected, as it has been often stated in official circles that both Roumania and Greece were withholding their assistance until the Allies either won a decisive victory or proved to the Greeks and Roumanians their ability to do so.

or until the operations had reached a stage which would assure them that their countries would not be overrun by the forces of the central powers or their Turkish and Balkan allies.

There is no inclination here or in the capitals of other members of the quadruple entente powers to minimize the seriousness of the situation of Serbia. The Austro-German and Bulgarian campaigns are developing slowly, but the plans are now fairly clear. The Austro-German centre is advancing down the Morava valley from Semendria, while the Bulgarians have got across this valley to the south and command the Belgrade-Nish-Saloniki railway. The Austro-Germans have three other forces engaged, one in the northwest near Shabatz, one at Belgrade, and the third, which has not yet crossed the Danube, about Orsova.

The Bulgars also have other armies moving across the frontier, near Zetart, Piro, and Nish, and further south near Egri, Palanka and Kobane, and claim to be already in Velez, on the Vardar river. It is this latter force, the Anglo-French troops, landed at Saloniki, will probably first encounter.

FIRE AT BAWL

About two o'clock on Monday morning fire occurred at Bawl, resulting in the loss of two buildings and most of their contents, so that the total loss would amount to fully \$5,000, only partially covered by insurance.

It appears the fire started over L. Aker's barber shop and pool room, in the building belonging to Carter Bros. The latter owned a part of the fixtures, including two pool tables, as well as the building. Their property would be worth around \$2,000, and was fairly insured.

NOTICE

IN THE ESTATE OF

ANN McKAY

late of Blackfalds, in the Province of Alberta, widow, deceased.

NOTICE is hereby given that all persons having claims on the estate of the above named Ann McKay, who died on the 12th day of August, A.D. 1915, are required to file with Arthur E. Dean, Esq., Lacombe, Alberta, Solicitor for the Executor, by the 13th day of December, A.D. 1915, a full statement, duly verified, of their claims and of any securities held by them, and that after that date the executor will distribute the assets of the deceased among the parties entitled thereto, having regard only to the claims of which notice has been so filed or which have been brought to their knowledge.

Dated this 18th day of October, A.D. 1915.

ARTHUR E. DEAN,
Solicitor for the Executor.

The Toronto Mail and
Empire and Western
Globe till Jan. 1, 1917

\$1.50

The Western Globe has not been in the habit of clubbing with other newspapers in the past, but owing to the fact that we have been able to make arrangements with the Toronto Weekly Mail and Empire, the leading home weekly of Canada, for a remarkably satisfactory rate, we are going to make our readers an unprecedented offer for the next two months.

Commencing to-day, we will mail free of charge to any address in Alberta The Western Globe and the Weekly Mail and Empire till January 1st, 1917 for \$1.50.

The Toronto Mail and Empire has the best stories of the Great European Struggle, written by their own reporters at the front. The paper also contains weekly market letters from all the large buying points, and keeps the reader thoroughly posted as to market conditions. The home department is unequalled in Canada, while the telegraphic service is the best. The Mail and Empire contains from sixteen to twenty-four pages in every issue.

Old subscribers to The Western Globe may have The Mail and Empire mailed to them from now until January 1st, 1917, for 55c.

EXTRA GOOD VALUES

Ladies' Cloth Coats

A Special Value at **\$9.75**

We have laid out, in the way of Bargain-Giving, 8 only—Ladies Cloth Coats—made up of Mixed Tweeds, Browns, Blues, and Greys. All are new and up-to-the-minute in Style, and our Special Price is Much Less than their actual value. Coats in value up to \$16.00, for

\$9.75

FOR THE PRICES CHARGED

Is the constant aim of our management. In these times, when so many lines are so scarce as to be unobtainable through ordinary channels, and so many lines advanced to prohibitive prices, we are still able to show wide selections, and to a large extent, at the old prices. But with all Europe engaged in war, and its manufacturing and export business paralyzed, it seems almost hopeless to stave off a period of very much higher prices in many lines of merchandise.

A List of Small Ware Novelties

Collars

Swiss Embroidered Organdie Collars, dainty new styles, in white, black, and in a range of colors. Each,

35c, 60c, 75c

Ties

Windsor Ties, a Choice Selection of Pure Silk Qualities, in Plaids, Spots, and Plain Colors, only

25c

Baby Bonnets

Pretty Baby Bonnets for winter wear. New Styles in Silk Velvet and Teddy Bear Cloths. A selection of colors.

85c to \$1.00

Belts

Ladies Black and White Check Belts. Special Value.

25c

Winter Caps

Warm Dressy Winter Caps, with the latest improved Fur and Knit Bands. Close Fitting, well made throughout. Each,

65c to \$2.00

MEN'S AND BOY'S Heavy Ribbed Underwear

These are shown in all the Good, Reliable Brands—Stanfields, Penmans, and Tiger Brand.

Men's Underwear, per garment, from**\$1.00**

Boys' Underwear, per garment, from**50c**

Men's Combinations, each, from**\$1.75**

Boys' Combinations, each, from**90c**

That Packing Plant

Mr. Boyle, the promoter of the proposed Packing Plant, which he intends erecting at Red Deer, called at the Western Globe office this week with reference to an item we published in our last issue warning the farmers not to invest their money in this scheme. He fully explained the scheme, and it looks exceedingly good on paper. Mr. Boyle was quite honest in explaining that the money he was getting from our farmers was purely for promotion expenses, and that if he was unable to put his scheme through his clients had no come-back. In fact, in their application for shares the farmers signed a proxy empowering the Boyle Syndicate to spend their money in any way it saw fit, without consulting them at all in the matter. He also stated that the farmers had paid for their interest with notes, which he immediately discounted at the local banks.

In view of the fact that those who put their money into the concern must have been aware that they were taking a chance—the application they signed telling them exactly what the Boyle Syndicate proposed to do—we have nothing further to say on the matter except that the local bank managers give it as their opinion that as an investment the scheme is not sound.

THAT WHEAT TARIFF

A special Minneapolis dispatch in Saturday's papers give some hint of the probable effect of the removal of the 10-cent tariff on Canadian wheat entering the United States. It would be well if Canadian farmers, who are urging for this concession, which may be secured by the removal of the Canadian tariff against United States wheat, were to carefully digest the information contained in that dispatch.

According to the Minneapolis writer the big millers of that city and the near city of St. Paul would be delighted if the tariff was removed. It would mean for them at least three things, as they view it. First, they would be assured a more

plentiful supply of Canadian No. 1 hard, which they must have for mixing purposes. Second, it would mean a lowering of wheat prices generally, their idea being that with free Canadian wheat coming into the country the price of the home grown would fall. And third, it would give them an opportunity to dominate the grain trade of the northwest on both sides of the international boundary.

From the viewpoint of the United States farmer the proposal is altogether objectionable. He is evidently of the same mind as the Minneapolis miller with respect to the effect such a move would have on prices, and naturally he does not want to see anything like that happening. If what these men believe is correct, it is doubtful if the Canadian farmer would care to try the experiment. But the Canadian farmer who is free trade in his notions cannot see anything like this happening. All that he is able to observe at the moment is the fact that market reports show United States wheat selling in Minneapolis at prices higher than are offered to him in the Canadian market at Winnipeg. He believes that the removal of the duty would enable him to sell at the higher United States price and he wants the duty removed instantly.

We have said before and repeat it that we can see no good reason why the Dominion Government should not treat this grain matter just as it treated the cement matter about three years ago when there was a serious shortage in Western Canada and Canadian mills were not making good with their shipments. At that time the duty was either removed or reduced temporarily, and United States cement was brought in. Something similar was done when the west had a long and serious coal strike some years ago and fuel supplies ran short.

Nothing short of an actual demonstration will suit the farmers, and inasmuch as they are the ones most directly interested and most likely to suffer if there should be any suffering, why not

let them have their way, at least temporarily? It is certain that if the government refuses their request it will get no credit for having saved them from the effects of their own foolishness. And if the experiment should happen to turn out a good thing, why, all the better. The government can surely have no objection to the farmers of the west making a little more money. They surely need it.

BELGIAN WORKERS ARE BEING FORCED TO DO MILITARY JOBS

London, Oct. 22.—The Antwerp correspondent of the Telegraph, according to a dispatch to the Reuter, Telegraph Company from Amsterdam, says that Belgian workmen are being forced to perform military work. The dispatch follows: "All reports from various districts agree that workmen are building a new front behind the Scheldt, to provide defences on Germans being forced to retreat. That they are already preparing for such a possibility is gathered by a proclamation issued at Brussels, according to which all ex-soldiers, former members of the civil guard, and all men of military age were summoned to report themselves. Hundreds who refused to obey the summons were arrested and sent to an unknown destination."

ALLIED BOMBARDMENT WAS VERY EFFECTIVE

London, Oct. 25.—The bombardment of Dedeagbach caused the death of ten civilians and over a thousand soldiers, and there also were a large number of soldiers wounded, says a dispatch to the Exchange company from Athens.

A large portion of the military casualties, the correspondent adds, were in the barracks which housed the 40th Bulgarian regiment. The barracks was crowded with soldiers, who were preparing for their meal when the bombardment was opened at 1 o'clock with an accurate fire which demolished the barracks, burying the occupants in the ruins. Troops engaged in digging trenches around the town also sustained very heavy losses.

German's Defeated

London, Oct. 25.—British correspondents in France have just disclosed the fact, made known to them by the British staff, that even after the Anglo-French offensive in September the Germans had the greatest difficulty in securing new reinforcements to meet that adventure and had to call upon men just returned from Russia for rest to fill the gaps in the western lines. From this it is argued that the Germans cannot spare a great many men for the Balkans, especially as the Russians are keeping them fairly busy from the Baltic to the Rumanian border.

The Italians, by the offensive, are compelling the Austrians to strengthen their lines, and the French, by their capture of the strongly fortified salient north of Lemesnil, in Champagne, have shown that they have not yet finished their effort to break through. The French success is considered important because the capture of this fortified area clears the ground for another general offensive in Champagne. For the same reason the British are trying to force the Germans out of their redoubts and the slag heaps to the south of LaBassee. These, however, are only preparatory preparations, while the Italians are in the midst of a great offensive which has already gained for them many valuable vantage points, and, according to Rome dispatches, may any day place them in possession of the fortress of Gorizia.

The Russians are fighting pitched battles in the Riga and Dvinsk regions in an effort to retake the ground won from them by Field Marshal von Hindenburg, last week. The Russian attacks southeast of Riga have been repulsed, according to the Germans, as were those undertaken northwest of Dvinsk. The German forces, however, which crossed the Iloukat, north of the town of that name, withdrew in the face of a superior Russian army.

It is also claimed by the Germans that Russian attacks in the lake district, south of Dvinsk, were repulsed, and that the Aus-

trians have broken through the Russian lines over a front of more than four kilometers (2½ miles) west of Komauow.

IMPORTANT SUCCESS

Paris, Oct. 25.—An important success by the French troops in the Champagne sector is announced by the French war office this afternoon. In spite of a fierce resistance, French troops, following a preparatory artillery fire, occupied an important position known as La Courtine. The losses of the Germans are described as serious and the French took 200 prisoners.

FRENCH TROOPS EFFECT JUNCTION WITH SERBS AND BULGARIANS FLEE

Paris, Oct. 25.—French troops gained a brilliant success by effecting a junction with the Serbs at Krivolak, says a dispatch to the Petit Parisien from Athens. The dispatch, dated Sunday, says: "Bulgarian troops in force were attacking in three columns when our troops, by a daring manoeuvre, turned the Bulgarian right flank while the Serbians launched an energetic counter-attack all along the front. At the end of the day the Bulgarians beat a retreat in the direction of Strumnitza, pursued by French troops and Serbian cavalry."

DECLARES VOLUNTARY SYSTEM IS SAVED

London, Oct. 24.—Horatio B. Bottomley, former Liberal member of parliament, speaking at Hackney last night, said that he had discussed the new recruiting scheme with the Earl of Derby, who told him that his experience already had convinced him that the voluntary system would be saved. The Earl of Derby added, according to the speaker, that this was something to be proud of, and that he confidently anticipated that by the end of November he would have sufficient recruits to meet all requirements.

MURDERS EMPLOYER AND IS, IN TURN, SHOT

Estevan, Sask., Oct. 24.—After shooting and badly wounding his employer in four places, Herbert Lamarche, a farm hand was himself shot and killed by a farmer on whose place he was cornered by the police.

Lamarche, who had relatives in Edmonton and a homestead somewhere in Alberta, acted very strangely when accompanying his employer, Ernest C. Morine, who farms twelve miles south of here, with a load of wheat to Larson, N.D. He wanted to be paid off and on the return journey was standing in the wagon behind Morine when he called, "Wally, I've got the drop on you," and as the farmer turned Lamarche fired five shots at him with a revolver. One went through Morine's cheek and lodged behind his nose, another struck him on the point of his right elbow, two in his thigh, and a fifth lodged in his pocket-book.

A threshing gang nearby, hearing the shots and Morine's cries for help, rushed toward the wagon, but Lamarche jumped out and disappeared into a creek close by. In the excitement he got a good start. Word was sent to Estevan and Constable Watson, of the R.N.W.M.P., drove out.

By this time Lamarche had reached Johnshunk farm, two miles north of the first shooting. Firing had been going on throughout the chase and Lamarche had now taken cover in a straw stack, but keeping up a lively fusillade. The straw pile was surrounded and Lamarche came into the open. He was told to throw up his hands, but in answer fired at Watson, who was hit, but not much hurt.

Lamarche advanced on Alex. Johnshunk, the owner of the farm. Watson fired, but the bullet hit the barrel of Lamarche's revolver and merely glanced off his thumb. Lamarche continued firing at Johnshunk, who finally raised the old-fashioned army rifle he had and replied. His bullet took Lamarche square in the forehead, passing through his skull. Lamarche dropped, and ten minutes after was dead.

MURDERERS TO ANSWER TO KAISER

London, Oct. 25.—The German Government has, it is reported, summoned Generals von Der Lancken and von Bissing, civil and military governors, of Belgium, to imperial headquarters to report personally concerning Miss Edith Cavell's execution. This is interpreted here today as meaning that their superiors may not unqualifiedly approve their action.

The impression here has been all along that the German authorities at Brussels hastened the execution lest the Kaiser pardon Miss Vavell or commute her sentence, and the attempt to prevent the American minister, Brand Whitlock, from knowing that sentence had been pronounced until its execution, is attributed to fear that the English woman's life would have been saved.

NUNN—MIDDLETON

On Friday, October 16, a quiet wedding took place at the home of Elder P.P. Adams, when Miss Georgia Middleton and Mr. Thomas Nunn, both of Lacombe, were united in marriage, Elder Adams officiating. They were supported by Miss Madge Smith and Mr. Lindley Beane. A few immediate relatives and friends were present.

Mr. and Mrs. Nunn will make their home on Mr. Nunn's farm, two miles east of Lacombe. Georgia is a former student of the Academy, and her old classmates and acquaintances join with the many other friends in extending congratulations and best wishes.

WATCH LOST

About two weeks ago, at the stockyards, Lacombe, a Waltham watch, P. S. Bartlett movement, No. 8463782, gold filled case No. 852616. Finder will be well rewarded on leaving same at this office. (O. 273c)
